

E-mail to Senator Mary Landrieu (June 25, 2009):

Senator Landrieu,

Are you planning to opt out of the health care plan you currently enjoy to enroll in the public plan that is in the works for the rest of us? If, as I suspect, your answer is No, then I don't want the public plan, either.

Please note how horribly the government has managed its inventions: Medicare, Medicaid and Social Security. With such a disastrous track record, government should focus solely on its constitutional mandates and butt out of managing our daily lives and work.

Fundamentally, the unbelievable power grab (the energy bill, the card check bill, ObamaCare, to name a few) is INFURIATING. STOP IT!!!
